

Creating Your First Assignment

Scoutlier is a highly adaptive tool that is designed to help you quickly transform your teaching to work effectively and equitably in any situation: in the classroom; at home; in a lab; on a field trip. Anywhere. Anytime. Let's walk through running a lesson via Scoutlier from account creation to reviewing student responses and you will see how easy it is to use.

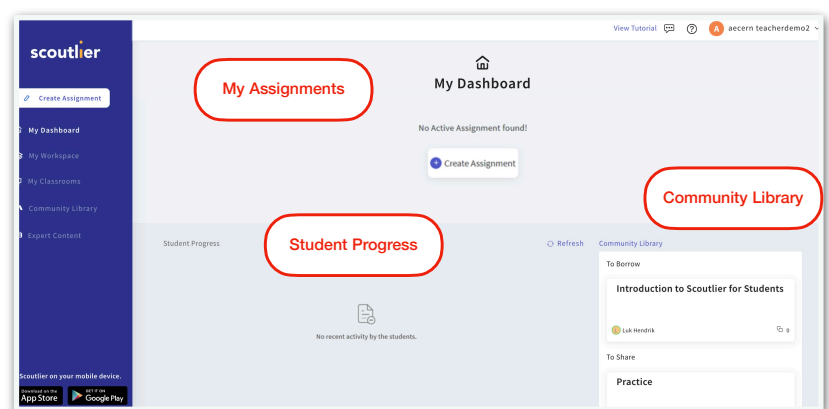

Visit scoutlier.com to create your free account.

Create your account with your email account or an existing Google or Microsoft email account.

A screenshot of the Scoutlier sign-up form. The form is titled "scoutlier" with the tagline "Learn Anywhere, Anytime". It includes fields for "Your Name" (Enter Full Name), "Email" (Enter Email), "Password" (Enter Password), and "Confirm Password" (Enter Password). There are also buttons for "Sign up with Google" and "Sign up with Microsoft". A "Sign Up" button is at the bottom. A link for "Already have an account? Login" is also present.

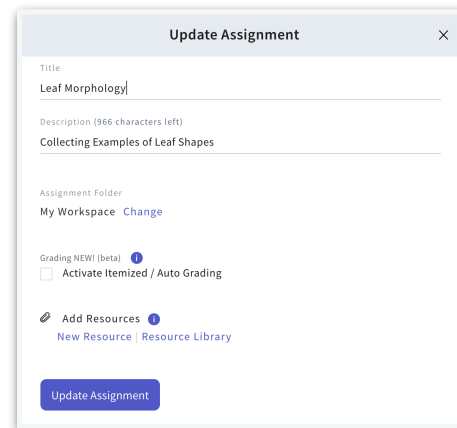

As a new user the dashboard looks a little empty. Don't worry it will soon be an active center of teaching and learning.

- My Assignments: This area of the dashboard will populate with all your active assignments.
- Student Progress: Here you will see the real time work of your students.
- Community Library: Look here for assignments and templates from the Scoutlier community to copy, edit and make your own.
- Expert Content: Here you will find content from our expert teachers and curriculum partners. You can easily copy this content and modify to meet your student needs

Click the [Create Assignment](#) button to start your first assignment.

- [Title](#): Enter the title of the assignment
- [Description](#): The description
- [Folder](#): Select the folder. You can create folders in My Workspace.
- [Grading](#): choose between two grading options the default grading which allows you to assign an overall grade and our new itemized and auto grading feature which is currently in beta
- [Add Resources](#): You can add links and resource for your students here or in a later step
- Click [Create Assignment](#)

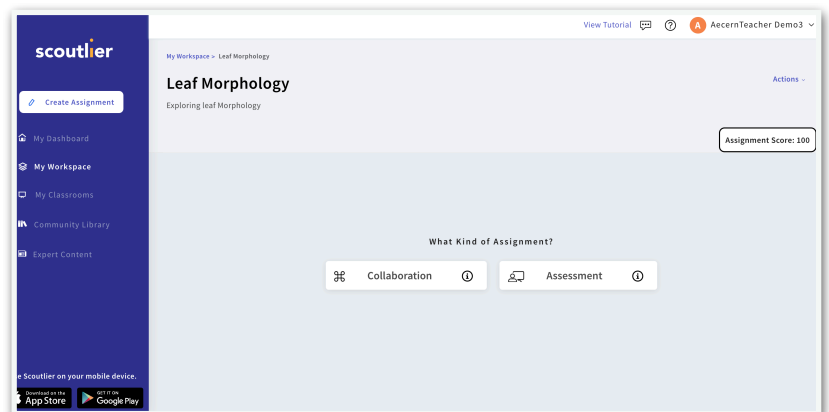

The 'Update Assignment' dialog box is shown with the following fields and options:

- Title:** Leaf Morphology
- Description (966 characters left):** Collecting Examples of Leaf Shapes
- Assignment Folder:** My Workspace (with a 'Change' link)
- Grading NEW! (beta):** ☐ Activate Itemized / Auto Grading
- Add Resources:** New Resource (with a 'Resource Library' link)
- Update Assignment** button

What Kind of Assignment?

Here you can choose between [Collaboration](#) where students can see each other's submissions or [Assessment](#) when only the teacher can see the students work.

The main assignment page for 'Leaf Morphology' is displayed. It includes a sidebar with navigation links (My Dashboard, My Workspace, My Classrooms, Community Library, Expert Content) and a 'Create Assignment' button. The main content area shows the assignment title 'Leaf Morphology' with the subtitle 'Exploring leaf Morphology'. A 'What Kind of Assignment?' section offers two options: 'Collaboration' (selected) and 'Assessment'. An 'Assignment Score: 100' badge is visible in the top right corner. The Scoutlier logo and mobile app download links are at the bottom.

Now let's build the assignment details. You can add resources such as web links and videos and tasks for students to complete.

scoutlier

Create Assignment

Leaf Morphology: Collaboration

Assignment Score: 100

Task Name

Add Resources

New Resource | Resource Library

Step 1

Instructions (Maximum 500 characters)

Add Actions:

Images Video Audio Form Table

Enter the number of photographs student should take 1 (Maximum 10)

Save Preview

In this example we have asked the students to submit photos of leaves and explain with text why they selected them. We could have had students give an audio or video response or even answer a multiple choice questions.

Clicking on Preview will allow you to see what the assignment will look like in the student view.

The screenshot shows a preview of an assignment titled "Leaf Morphology" with the subtitle "Collecting Examples of Leaf Shapes". In the top right corner, a box indicates "Assignment Score: 100". Below this, a section titled "Collaboration" contains a link to "Examples of Leaf Shapes and Structures". Under this link, there are two steps: "Step 1" which asks the student to take 5 photos of different leaf shapes or structures, and "Step 2" which asks the student to list each of the features they selected to photograph. The interface includes icons for taking photos and a text input area for the list of features.

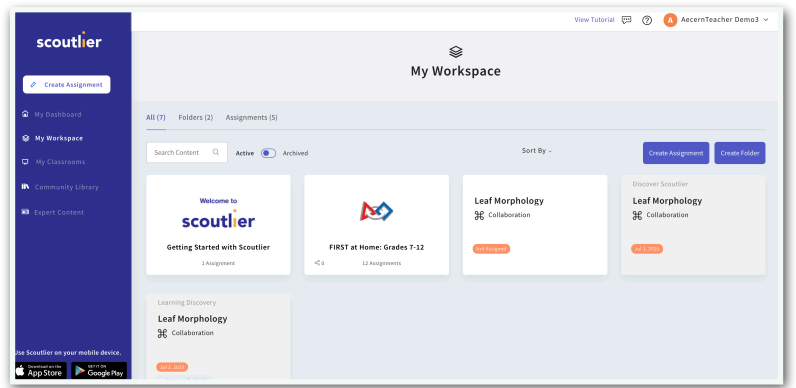

When you save the assignment you will be able to assign it to students.

If you are using Google Classroom or Scoutlier Classroom you can select the classes and due date. You can also share an assignment with a code. Just copy the link with the code and share via email or your LMS.

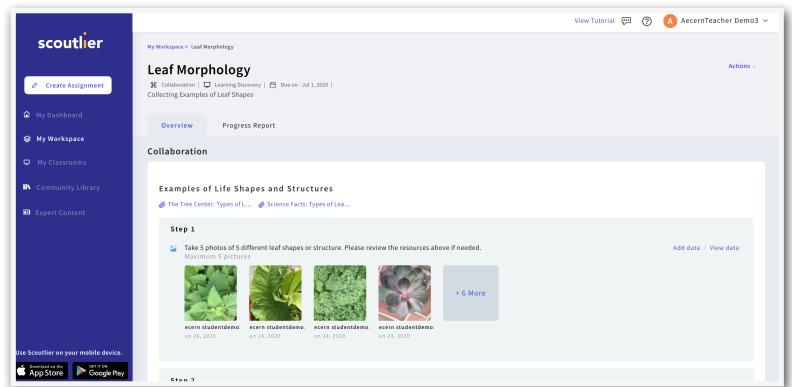

The "Assign Assignments" dialog box shows options to assign the assignment to "Learning Discovery" and "Discover Scoutlier". A "Due Date" of "August 19, 2021" is set. To the right of the dialog, two red callout boxes highlight "Scoutlier Classroom" and "Google Classroom". A blue "Assign" button is at the bottom of the dialog.

The student-facing page says "Hey Students!" and instructs them to go to <https://student.scoutlier.com> and type in the code **I6Z4Q5**. A red callout box highlights "Assign with code". Below the code, it says "You can share this link with your students" and provides a link: <https://student.scoutlier.com/code?assignmentCode=I6Z4Q5>. A blue "Copy Link" button is next to the link.

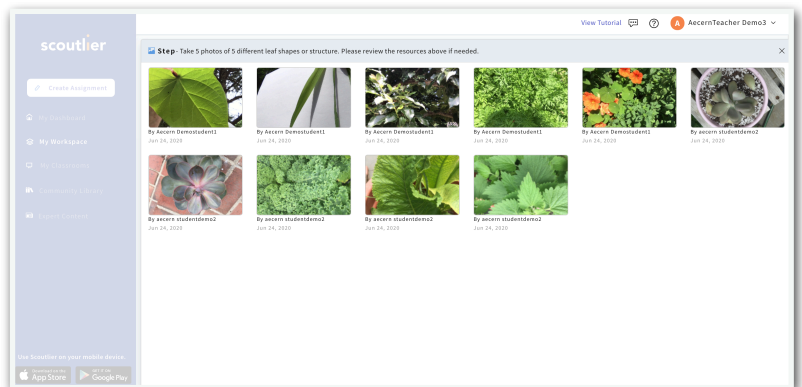

Your assignments will appear in My Workspace and under the assignments tab.

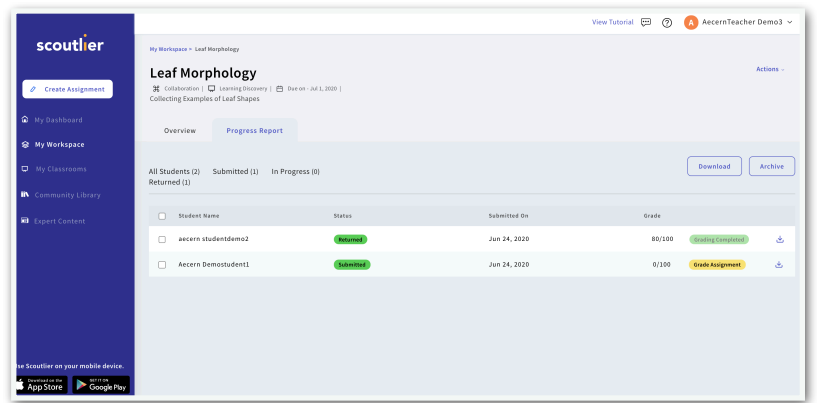

When you open the assignment you will see the student results submitted in the overview tab. Clicking on view data on the right will allow you to see all the results submitted.

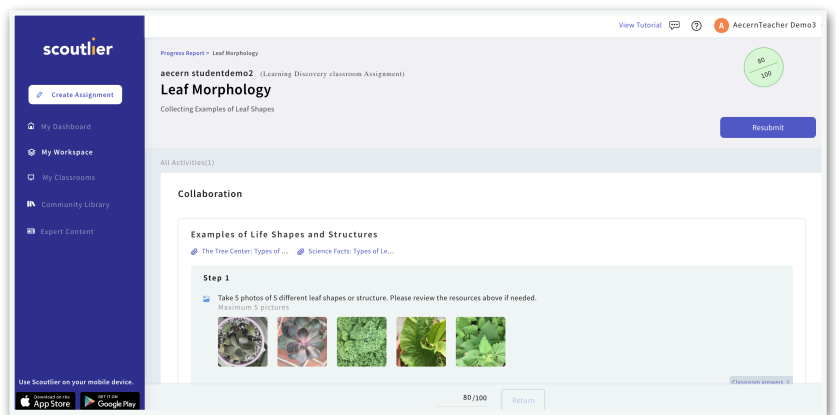

Each photo is labeled with the student's name. If this was a collaborative assignment students would also be able to see all the submissions.

In the Progress Report tab you can see individual student progress.

Select a student to review their work and enter a grade. If you are not satisfied with a students work you can click on Resubmit and ask them to resubmit part or all of the assignment.

We have just run through a lesson from creation to reviewing student responses now it is time give it a try.
